Claim Listing

This listing of claims will replace all prior versions, and listings, of claims in the application.

- 1. (Currently Amended) A genetically engineered fluorescent protein comprising a fluorescent protein which incorporates by insertion a protease cleavage site into a single fluorescent protein, cleavage of said fluorescent protein at said cleavage site by a protease causing the alteration of at least one of an emission and an excitation spectra of said fluorescent protein, said fluorescent protein having SEQ ID NO: 41.
- 2. (Original) A fluorescent protein according to claim 1, being a green fluorescent protein.
 - 3. Cancelled.
- 4. (Currently Amended) A fluorescent protein according to claim [[3]] $\underline{2}$, wherein said <u>cleavage site is inserted between β -sheet pair of adjacent β -sheets are selected from the group consisting of β -sheet pairs number 9 and 10, 5 and 6, and 8 and 9.</u>
 - 5. Cancelled.
 - 6. Cancelled.
- 7. (Previously presented) A fluorescent protein according to claim 1, said cleavage site having the sequence of SEQ ID NO: 4.
 - 8-24. Cancelled.
- 25. (Original) A fluorescent protein according to claim 1, said protease being a caspase.
- 26. (Original) A fluorescent protein according to claim 25, said caspase being selected from the group consisting of caspase-3, caspase-6, caspase 7, caspase-8 and caspase-9.
 - 27. Cancelled.
- 28. (Currently Amended) A genetically engineered fluorescent protein comprising:

a <u>single genetically engineered</u> green fluorescent protein <u>having only one chromophore</u>, <u>said protein</u> having a loop structure, said loop structure having incorporated therein a protease cleaving site, said loop structure positioned between a first β sheet of said fluorescent protein and a second β sheet of said fluorescent protein adjacent to said first β sheet wherein cleavage of said fluorescent protein at said cleavage site alters at least one of an emission spectra and an excitation spectra of said fluorescent protein.

- 29. Cancelled.
- 30. (Previously presented) The modified fluorescent protein according to claim 28 wherein said first β sheet and said second β sheet are selected from β sheet pairs consisting of β sheet pair 5 and 6, β sheet pair 8 and 9, and β sheet pair 9 and 10.
- 31. (Previously presented) The modified fluorescent protein according to claim 28 wherein said modified fluorescent protein has an amino acid sequence according to SEQ. ID NO: 41.
- 32. (Previously presented) The modified fluorescent protein according to claim 28 wherein said cleavage site defines a sequence according to SEQ. ID NO: 4.
- 33. (Previously presented) The modified fluorescent protein according to claim 28 wherein said protease is a caspase.
- 34. (Previously presented) The modified fluorescent protein according to claim 33 wherein said caspase is selected from a group consisting of caspase-3, caspase-8, and caspase-9.
 - 35. Cancelled.
- 36. (Previously presented) A fluorescent protein according to claim 1 wherein said cleavage site has a sequence of SEQ. ID NO: 4.
 - 37-39. Cancelled.
